FIRST SESSION:

9:00AM–11:00AM

FOUR TECHNOLOGIES THAT ARE CHANGING RIM TODAY

by **Wayland Harkey and John Sakers**
Imaging Solutions and Services, Inc.

Trends in technology automation are creating efficiencies in the way we capture, process, manage, and search for information. RIM Professionals can keep pace by gaining an introductory understanding of the possibilities for Advanced Capture, Robotic Process Automation, Content Services, and Federated Search.

John Sakers has been working in the digital document automation industry for 18 years. John is the Director of Solutions Consulting at Imaging Solutions and Services, Inc. and is based in Atlanta.

John has worked on digital automation projects that include office and engineering document conversion solutions; document management application design and implementation; business process automation; and advanced capture technologies. John earned his degree from Cornell University.

Wayland Harkey is a 25-year veteran of the ECM/Imaging industry. Currently, he is the Business Solutions Director for Imaging Solutions and Services, Inc. (ISSI) where he applies technology solutions to meet client requirements. Previously, he served with Eastman Kodak Company (now Alaris, a Kodak Alaris Company), where he developed expertise in the design, creation, and marketing of many data capture and document imaging technologies and solutions. He achieved a Master of Science from Florida State University.

Imaging Solutions and Services, Inc. (ISSI) was founded in 1995 to support our customer's requirements for document capture, document extraction, and records management. Learn more about ISSI at www.issi-online.com.

SECOND SESSION:

11:15AM–12:15PM

HIPAA, PRIVACY AND SECURITY FUNDAMENTALS

by **Sue Gray, RHIA**
SH Data Technologies

Sue Gray is a Registered Health Information Administrator with more than 30 of experience in the healthcare industry. She has been the Health Information Administrator in both rural and metropolitan Acute Care Hospitals ranging from 59 to 575 beds. She served as an Adjunct Faculty Member at Roane State Community College in the Health Information Technology Program for 8 years, and served as a Clinical Site

Supervisor for more than 25 years. Her areas of expertise are Regulatory Agencies, Legal Aspects for Healthcare and Health Data Systems. She has consulted for Behavioral Health, Long Term Care, Veterinary Medicine, Legal Industry, and General Industry.

Sue was the Health Information Administrator and Statistician at The University of Tennessee College of Veterinary Medicine Veterinary Teaching Hospital for 24 years. She joined Smith & Hammaker/SH Data Technologies in 2013 as their Corporate Compliance Officer and provides Managed Compliance Services (Information Governance) to their Clients.
